Re: Material from Japan

Dear Customer,

Following the recent tragic events that have struck Japan, there is a growing concern regarding the availability and potential contamination of materials coming from Japan.

We would like to reassure our customers by confirming that the products supplied to you by OSD Ecotech Group:

- Are not manufactured in Japan
- Are manufactured using raw materials that do not originate from Japan

Therefore these unfortunate events have no impact on the availability or safety of the products you purchase from us.

Please note that we keep on closely monitoring the situation; if circumstances change that affect our business, we will promptly contact you again.

Yours sincerely,

Quality Auditor
Paolo Gaibotti
